

## ***Guidelines and Recommendations about Screening EBM Working Group***

### **Relevance?**

Will information, if true, have a direct bearing on patient care?  
Is this problem common, will it require me to change my practice?  
If true, will it require me to change my practice?

### **Are the recommendations valid?**

Is there randomized controlled trial evidence that earlier intervention works?  
Were the data identified, selected, and combined in an unbiased fashion?

### **What are the recommendations and will they help you in caring for your patient?**

What are the benefits?  
What are the harms?  
How do these compare in different people and with different screening strategies?  
What is the impact of people's values and preferences?  
What is the impact of uncertainty?  
What is the cost-effectiveness?
